

Durham Landscape Guidelines

Trees: Native Species by County Character Area

Native Species by County Character Area

When planting trees and shrubs in non-woodland situations – hedgerow and field trees, amenity planting – the use of native species, or species characteristic of the local landscape, helps to conserve local landscape character.

The following pages give a list of native species found in each of the six County Character Areas.

The following pages give a list of native species found in each of the six County Character Areas.

Species Native to the North Pennines

Major Species

Ash
Sessile Oak
Common Oak
